SUMMARY

Full stack engineer, 3 years. Angular, ASP.NET Core, Oracle PL/SQL. Ships features end to end – schema, stored procedures, REST APIs, front end. Built approval workflow engines, scheduled processing, and lifecycle state machines on an enterprise platform; migrated legacy VB.NET/WCF to C# and ASP.NET Core. Ships production side projects on Fastify, PostgreSQL, and React Native.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, SQL, PL/SQL, Python

Frontend: Angular 8/12/18, React 19, Next.js 16, React Native, Expo, Redux, TanStack Query, RxJS, HTML5, CSS3, Tailwind CSS, Bootstrap, reusable component design

Backend: ASP.NET Core, .NET 5/7/9, REST APIs, MVC, Dependency Injection, Quartz.NET, Swagger/OpenAPI, Node.js, Express, Fastify, Zod, JWT, argon2id, Supabase

Database: Oracle Database, PL/SQL packages, stored procedures, functions, query optimization, indexing, Dapper, PostgreSQL, Drizzle ORM, schema migrations, MongoDB

Cloud and DevOps: Google Cloud Storage, AWS S3, Cloudflare R2, Vercel, Render, Netlify, GitLab YAML CI/CD, GitHub Actions, SonarQube, IIS

Tools: Git, GitLab, GitHub, Jira, Postman, Visual Studio, VS Code, Capacitor, pnpm monorepos, Claude Code, OpenAI Codex

Practices: SDLC, Agile/Scrum, code review, production support, root cause analysis, QA and UAT support, deployment coordination, unit and integration testing, application security, architecture decision records

EXPERIENCE

Associate Software Engineer, Greater Than Educational Technologies Pvt Ltd

Nov 2023 – Present

Hyderabad, India

- Delivered 342 work items across 6 modules – 254 tasks, 28 stories, 60 defects – owning schema, API, and UI for each feature.
- Architected a multi-stage approval engine: insertable stages, routing across 5 approver levels, append-only audit history.
- Automated record lifecycles with Quartz.NET schedulers – timed transitions, escalation, reminders, bounded auto-extension.
- Modernized VB.NET and WCF services to C# and ASP.NET Core with clean contracts and constructor injection.
- Migrated 3 Angular majors (8 to 18) and 3 .NET versions (5 to 9), clearing RxJS, routing, and build breakages.
- Dropped a commercial UI licence by rebuilding grid and form screens as reusable Angular components.
- Computed claim amounts server-side from geospatial coordinates, tiered rate tables, and grade eligibility rules.
- Added bulk spreadsheet ingestion with row-level validation and per-record status in place of an opaque batch result.
- Resolved 9 production incidents via execution plan analysis; added covering indexes on high-cardinality query paths.
- Ran merge request reviews, YAML CI/CD pipelines, and SonarQube quality gates.
- Partnered with business stakeholders and QA through requirement analysis, UAT, and release sign-off across 6 module rollouts.

Software Development Intern, Zentek Infosoft Consulting Pvt Ltd

Jun 2023 – Oct 2023

Jaipur, India

- Shipped 4 projects in 5 months across React.js, Redux, and the MERN stack.
- Built iNotebook, a MERN note app with multi-user accounts, credential auth, and per-user CRUD.
- Wired a banking interface to Redux; built a 3D client site UI in JavaScript, HTML, and CSS.

PROJECTS

Ascension | Fastify 5, PostgreSQL, Drizzle, Expo, React Native, TypeScript

Repo | Live

- Cross-platform training log, live on Android and web from one Expo codebase: 29 screens, Fastify API with 76 endpoints, 27-table PostgreSQL schema, 13 forward-only migrations, pnpm monorepo.
- Zod schemas shared as the API contract, so client and server types cannot diverge.

- All arithmetic in a dependency-free domain package – 21 pure modules, 562 tests, 100% branch coverage as a CI gate, fixed-point integers not floats.
- argon2id hashing, 15-minute JWTs, rotating refresh tokens with family revoke, 404-over-403 to block id enumeration; cut Android permissions from 28 to 11.
- 5 GitHub Actions jobs, pre-traffic migrations on Render, hash-pinned CSP verified on every web deploy.

Audiophilic | Next.js 16, React 19, TypeScript, Zustand, Capacitor

Repo | Live

- Music player: Howler.js playback, Zustand state, Spotify Web Playback SDK.
- Adaptive theming derived from album artwork; Android build via Capacitor from one TypeScript codebase.
- GitHub Actions and Vercel pipeline with ESLint and Tailwind CSS 4.

Portfolio CMS | Next.js, React, Supabase, TypeScript

Repo | Live

- Projects, experience, and skills stored as queryable Supabase content, not hardcoded markup.
- Typed data access from the Next.js layer; custom domain, automated builds on push.

EDUCATION

Master of Business Administration (Finance)

2024 – 2026

The ICFAI Foundation for Higher Education, Hyderabad | 6.45

Integrated M.Sc. Aviation (GDS)

2018 – 2023

JNTU Hyderabad, Telangana | 72%

CERTIFICATIONS

- Career Essentials in Generative AI – Microsoft and LinkedIn
- Foundational C# with Microsoft – freeCodeCamp
